Secure Funding for MDR

FCC Cybersecurity Pilot Program

The FCC announced the Schools and Libraries Cybersecurity Pilot Program, a three-year, $200 million initiative to explore ways to protect educational institutions from cyberattacks. **Applications open September 17, 2024, and close November 1, 2024.**

ActZero MDR is eligible

ActZero is qualified under Category 2 and 4: "Endpoint Protection" and "Monitoring Detection and Response" in the Eligible Services List. With ActZero, you can ensure your cybersecurity protection complies with FCC requirements for the Pilot Program.

Managed Detection & Response, includes Endpoint Protection and Extended Detection and Response (EDR and XDR)

Key Features included with ActZero MDR

Here is a list of applicable Category 2 and 4 ActZero features/services written in the same language.

- **Endpoint Detection & Response**
- **Extended Detection & Response**
- **Vulnerability Management**
- **Threat Hunting/Threat Intelligence**
- **Dark Web Scanning**
- **24/7 SOC**
- **Network and Device Monitoring and Response**
- **Compliance Assessment**
- **Maturity Models**

Why ActZero?

Coverage across entire IT environment: Collect data from all endpoints, network, mobile devices, cloud, identity, and email accounts, using tools such as EDR, XDR, NGAV, SIEM, CSPM, log management, and vulnerability scanning to detect threats effectively.

Better block rate with top EDR: Includes CrowdStrike EDR and NGAV licenses enhanced by our own AI/ML capabilities with an 88% block rate.

Fewer alerts: Less than 6 alerts per month.

Quick response: Contains threats in ~10 milliseconds. <6 min Mean Time to First Response compared to industry average of 30 minutes.

24/7 coverage with analysts available to review detections, triage, and respond to prevent incidents.
